

	 Denmark	 Finland	 Iceland	 Norway	 Sweden
 A1-A3 Raw materials, transport, manufacturing	Zero ✓	Zero ✓	Zero** ✓	Zero, but if there is GWP from processing of the reused products it must be included***	Zero ✓
 A4/A5 Transport to site, installation	Transportation to site and installation is included	Either generic values from national database* or calculate exact emissions	Zero ✓	Either 300 km, generic values****	Either generic values from national database***** or calculate exact values*****
 B2 Maintenance	Not declared	Not declared	Zero ✓	Maintenance is included	Not declared
 B4 Replacement	Zero ✓	Replacement to a new product	Zero ✓	Replacement to a new product	Not declared
 C1/C2 Demolition works, transport	Not declared	Included according to the scenarios in the national database	Zero ✓	Not declared	Not declared
 C3/C4 Waste management, final disposal	Zero ✓	Included according to the scenarios in the national database	Zero ✓	Not declared	Not declared

European Union framework
is still under discussion

* Finnish National Database: [CO2data.fi](https://co2data.fi)

** For direct reuse. If processing is needed the associated GWP should be included: [LCA Iceland](https://lca.iceland.is)

*** Not if negligible i.e GWP from washing the reused products

**** Norwegian National LCA Database: [LCA.no](https://lca.no)

***** Swedish National Database: [Climate database from Boverket](https://climate.database.from.boverket.se)

***** Replacements are included, an assumption has to be made that if a reused product will be replaced, it will be replaced to a new functionally similar product (not another reused product)
